

Carbon Reduction Plan Template

Supplier name:Borderlands Outdoor Instruction Ltd.....

Publication date: 01/08/2026.....

Commitment to achieving Net Zero

Borderlands Outdoor Instruction Ltd is committed to achieving Net Zero emissions by 2035.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: April 2025-April 2026	
Borderlands Outdoor has no scope 1 emissions. We cannot calculate scope 2 emissions as our energy supply is centrally purchased at a serviced office base, which has multiple SMEs, not charged individually for energy and water on a metered basis. We would note however, that the office has maximum roofspace dedicated to solar generation and supplies EV charging points at the majority of parking spaces. We have calculated our scope 3 emissions for this baseline period based on travel to and from courses by our regular first aid trainers. Future carbon reduction plans will include calculations for the outdoor pursuits element of the business.	
Baseline year emissions: 3326KG	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	0
Scope 2	0
Scope 3 (Included Sources)	3326 kg CO ₂ Based on travel of 17561 km in vehicle assessed as generating 0.165kg / km, 1320km in vehicle generating 0.178kg/km and 933 km in vehicle

	generating 0.207. Generation figures taken from the GHG protocol cross-sector emissions factors table.
Total Emissions	3326kg CO2

Current Emissions Reporting

Reporting Year: 2026-27	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	0
Scope 2	0
Scope 3 (Included Sources)	To be confirmed at year end
Total Emissions	To be confirmed at year end

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 1100 tCO₂e by 2031. This is a reduction of 66.92%

Carbon Reduction Projects

In the next 5 years, we intend to undertake the following carbon reduction projects:

Replacement of lead trainer vehicle from diesel to electric van

Expansion of our trainer network to include additional trainers in south-west Wales and south-east England in order to reduce the miles of trainer travel required.

Advocate to our awarding organisation for the provision of electronic documentation and course materials over paper documentation, with associated reductions in the need for postage of hard copy course manuals.

Provision of social media group to encourage lift-sharing to our public courses (not measurable in terms of emissions)

Undertaking a more detailed analysis of the emissions associated with the CPR manikins and disposable airways in current use. This will inform future purchasing decisions as existing equipment reaches end of life.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).
